PROFESSIONAL SUMMARY

I am a Computer Science student with strong academic performance, currently focused on learning Data Science, Python libraries, and core concepts such as statistics, data visualization, and machine learning fundamentals. I have a keen interest in applying data-driven approaches to solve real-world problems and enjoy working with datasets to extract meaningful insights. Alongside my technical learning, I am deeply interested in research, particularly in exploring how data science techniques can contribute to innovation and knowledge building. I am seeking opportunities where I can apply my skills, enhance my expertise, and contribute to impactful projects in a supportive and growth-oriented environment.
